EVERY OUR CLIENT IS
A PARTNER

About us

NetLS is a European outsource software development company founded in 2007. We are an efficient team of young and ambitious specialists possessing skills and experience in the whole spectrum of IT-related services including design, front-end, back-end and cross-platform development. While bringing your ideas to life, we progress and become better.

Our key features are, firstly, individual approach to every project and, secondly, a well-balanced combination of quality and price.

Why us

THE TEAM

Our team is built around what clients needs, and is always fully engaged in the entirety of your project. From account managers to project managers, designers and developers, our team is process driven, customer focused, and fully coordinated to fulfill your needs.

THE PROCESS

Our team utilizes various methodologies to ensure the delivery of your projects. We use everything from Waterfall to Scrum, to ensure that the process is bespoke for your particular project needs.

THE COST

We strive to create solutions that can fit within any and all budgets. We are flexible and always willing to find a way to meet your needs, no matter the budget.

THE EXPERIENCE

We've been operating internationally since 2010. We have grown every step of the way, developing projects, expanding our competencies, and meeting our clients expectations. In this market you want to know that your provider is stable, and our track record proves that we are here to stay.

THE EXPERTISE

A lot of people throw around the term "full stack", but we truly are. Our developers aren't accustomed to utilizing one technology, they are steeped in numerous frameworks, meaning that no matter the project specification, we will have a team that can adapt and give you what you need.

THE CONFIDENTIALITY

Non-disclosure agreements can be signed upon request to insure the security and protection of the information and data.

Why Ukraine

Talent. With 15,000 IT graduates annually, Ukraine in 2014 ranked 4th place in the world in terms of the amount of Certified IT specialists, and still remains a leader in the industry.

Cultural similarities. Ukrainian developers tend to have a more collaborative and flexible approach to projects. This allows for better collaboration, with a company and more consistency within teams.

Location. Ukraine's location is close to Western Europe so you can arrange meetings with development team with less expense, and for Western European clients it can take only 1-3 hours to reach their nearshore development team in Ukraine.

Ukraine has strong educational system.

Simplified tax and legal system.

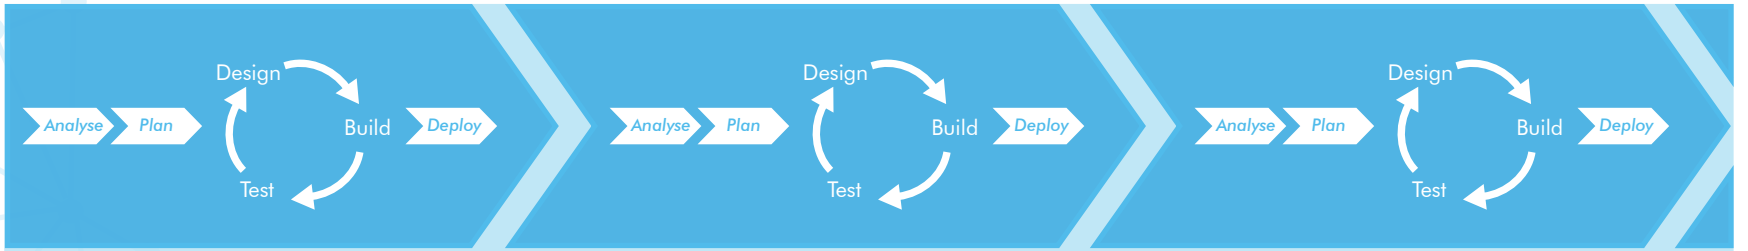

Low level of local risk.
